## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1-4, drawn to Acoustic transducer manufacture, classified in class 26, subclass 594.
  - II. Claims 5-18, drawn to panel loudspeaker, classified in class 381, subclass 111.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a different process without identifying favorable modal parameters.

In addition Invention I and II will require different search and consideration throughout prosecution. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
